## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 1A, 1B. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 3 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claims 3 and 5 each recite the limitation "the separate air or high-concentration oxygen" in lines 1-2. There is insufficient antecedent basis for this limitation in the claims. To overcome this rejection, "the" should be changed to "a."

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Reimann (4,029,574).

7. Reimann '574 teaches a process for treating wastewater, comprising introducing purified oxygen into water containing aerobic bacteria (1), collecting off-gas from the water in a recycle circuit (4, 2), separating carbon dioxide from the off-gas in an adsorption unit (7), further separating carbon dioxide from the off-gas in a pressure swing adsorption unit (12) to produce 85% pure oxygen, feeding air (13) to the pressure swing adsorption unit with the off-gas stream, and re-injecting the purified oxygen into the water (see figures, col. 3, line 38 to col. 4, line 62, col. 5, lines 30-34, col. 6, lines 6-60, claims 1-5).

8. Claims 2, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Satchell, Jr. et al. (5,275,742).

9. Satchell, Jr. et al. '742 teach a waste water treatment method, comprising injecting greater than 90% pure oxygen with ozone into the water (6), collecting an off-gas in a recycle circuit, separating carbon dioxide from the off-gas in a pressure swing adsorption unit (2) to produce 93.1% pure oxygen, feeding air to the adsorption unit with the off-gas stream, and re-injecting the purified oxygen into the water (see figure, col. 1, lines 9-14, col. 4, line 47 to col. 5, line 19, col. 6, lines 5-7, col. 7, lines 20-24, col. 8, lines 18-51).

***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference to Wang et al. (5,399,267) discloses a liquid treatment system with air emission control.
